LIST OF TABLES

TABLE	PAGE
1. Types of material and their rates of production.	57
2. Interarrival times for various rates of throughput	59
3. Probabilities for output sampling.	66
4. Model notations for the various simulation runs.	75
5. Statistics on the retrieval and back-order queues.	87
6. Stacker and pigeonhole statistics and the total time spent in the system	88
7. Statistics of M5(64, 16, 78) and M6(32, 16, 78) at 224 simula- tion hours	93
8. Stacker and pigeonhole statistics and total time in the system of M5(64, 16, 78) and M6(32, 16, 78)	93
9. Statistics of M6(32, 16, 78) and M11(32, 32, 78) at 156 hours . .	96
10. Statistics of M6(32, 16, 78) and M11(32, 32, 78). (Stacker and pigeonhole).	96
11. Preload statistics	104
12. Preload statistics (cont'd).	105

ACKNOWLEDGEMENTS

I am greatly indebted to Dr. L. E. Gresh, whose guidance and advice were invaluable in the course of this work. In spite of his busy schedule he was always readily available for counsel.

I also acknowledge Mrs. Sharon Morrissey for having deciphered my handwriting and done an excellent job of typing the manuscript.
