ACKNOWLEDGMENTS

The author is most appreciative of the advice, constructive criticism and encouragement of Dr. James Albracht, Associate Professor of Education, Howard Bradley, Associate Professor of Education, and Paul Stevenson, Associate Professor of Agricultural Engineering, all of Kansas State University who served on my committee and whose inspiration and guidance was invaluable.

A special thanks goes to the twenty-eight male students enrolled in vocational agriculture at Ensign High School and the sixty-four male students of Cimarron High School for their contribution to this study and to Neal Phelps, Guidance Counselor, of Cimarron-Ensign Consolidated Unified School District No. 102 for his assistance. The advice and encouragement of Dr. Gordon Price, Professor of Education at Fort Hays Kansas State College was appreciated.

This study would not have been successful without the continual encouragement of my wife, Beverly, and the patience and understanding of my children, Janice, Dennis, Vicki and Steve. I am deeply indebted to them.
