

THE EFFECTS OF VARIOUS LAUNDRY TEMPERATURES, OBSERVATION  
POINTS, AND DETERGENT CONCENTRATIONS ON THE SURVIVAL OF  
TRICHOPHYTON MENTAGROPHYTES ON MILITARY SOCK FABRIC

JEANINE ANNE STRITZKE

B. S., Kansas State University, 1970

#### ACKNOWLEDGMENTS

The author wishes to recognize the members of her graduate committee for their assistance in planning, and carrying out the research. Sincere appreciation goes to Dr. Jessie Warden, major professor and head of the Department of Clothing, Textiles, and Interior Design; to Dr. Donald C. Kelley, professor in the Department of Infectious Diseases; and to Dr. Shirley E. Friend, Assistant professor in the Department of Clothing, Textiles, and Interior Design. A special thanks is also given to Mr. Gary Plumberg and Gary Fina for their suggestions and assistance in the bacteriological work. This research was sponsored and funded by the T.H.E.M.I.S. project of the United States Air Force.

## TABLE OF CONTENTS

	Page
LIST OF TABLES.....	iv
LIST OF FIGURES.....	viii
INTRODUCTION.....	1
Key Words.....	4
REVIEW OF LITERATURE.....	5
<u>Trichophyton mentagrophytes</u> .....	5
Skin Infections as a Military Problem.....	6
Clothing as a Means of Transference.....	8
Importance of Laundry in Disease Transference.....	10
Effect of Water Temperature.....	13
Laboratory Studies of the Effect of Temperature on <u>Trichophyton mentagrophytes</u> .....	14
Effect of Detergents and Detergent Concentration.....	15
Laboratory Studies of the Effect of Detergent Concentration on <u>Trichophyton mentagrophytes</u> .....	18
Effects of Agitation Time.....	18
Effect of Drying.....	19
Effect of pH.....	19
Summary of Review of Literature.....	19
PROCEDURE.....	21
Laundry Equipment.....	21
Water Temperature.....	21
Detergent.....	22
Fabric Preparation and Sampling.....	22
Inoculation Procedures.....	23

	Page
Experimental Laundry Sequence.....	26
Statistical Analysis.....	28
RESULTS AND DISCUSSION.....	33
Effect of Water Temperature.....	33
Effect of Detergent Concentration.....	34
Effect of Observation Points Within Laundry Cycle.....	37
Effect of Inoculation Treatment.....	40
Effect of pH.....	45
CONCLUSIONS AND RECOMMENDATIONS.....	49
LITERATURE CITED.....	52
APPENDIX A. Figures of Interactions of Variables.....	55
APPENDIX B. Tables of Data and Analysis of Variance.....	62
APPENDIX C. Fabric Specifications.....	74
APPENDIX D. Artificial Soil Used in Research.....	77

## LIST OF FIGURES

Figure	Page
1. Incubating Flasks of Broth on Shaker.....	25
2. Receptacles Containing: A. Sterile Distilled Water; B. Hyphal Suspension of the Organism with Horse Hair; and C. the Artificial Soil.....	25
3. Swatches Hanging in Isco Chamber to Incubate.....	27
4. <u>Trichophyton mentagrophytes</u> Growing on the Fabric Swatch.....	27
5. Growth of the Organism on Plated Swatches After Laundry.....	29
6. Growth of the Organism on Plates Streaked with Swubes Taken From: A. the Washer; B. the Dryer; and C. the Wash Water.....	29
7. Flow Chart of Experimental Sequence.....	31
8. Mean Number of Swatches with Fungal Survival on Soiled- Inoculated and Unsoiled-Inoculated Fabric at 3 Water Temperatures.....	35
9. Mean Number of Swatches with Fungal Redeposition on Soiled- Uninoculated and Unsoiled-Uninoculated Fabric at 3 Water Temperatures.....	36
10. Mean Number of Swatches with Fungal Survival on Soiled- Inoculated and Unsoiled-Inoculated Swatches at 2 Detergent Concentrations.....	38
11. Mean Number of Swatches with Fungal Redeposition on Soiled- Uninoculated and Unsoiled-Uninoculated Swatches at 2 Detergent Concentrations.....	39

Figure	Page
12. Mean Number of Swatches with Fungal Survival on Soiled- Inoculated and Unsoiled-Inoculated Swatches After 2 Minutes of Agitation, After the Completed Cycle, and After Drying.....	41
13. Mean Number of Swatches with Fungal Redeposition on Soiled- Uninoculated and Unsoiled-Uninoculated Swatches After 2 Minutes of Agitation, After the Complete Cycle and After Drying.....	42
14. Average Number of Swatches with Fungal Survival After Laundry at Combined Observation Points of 4 Fabric Treatments.....	44
15. Survival of <u>Trichophyton mentagrophytes</u> in the Wash Water, Rinse Water, Washer Tub, and Dryer After Washing Inoculated-Unsoiled Swatches at 100°F. and with 2 Detergent Concentrations.....	46
16. Survival of <u>Trichophyton mentagrophytes</u> in the Wash Water, Rinse Water, and Washer Tub After Washing Inoculated-Unsoiled Swatches at 100°F. and with 2 Detergent Concentrations.....	47
17. Mean Number of Swatches with Fungal Survival on Inoculated- Soiled Fabric at 3 Observation Points, 3 Water Temperatures, and Washed in a 0.0% Detergent Concentration.....	56
18. Mean Number of Swatches with Fungal Survival on Inoculated- Soiled Fabric at 3 Observation Points, 3 Water Temperatures, and Washed in a 0.0% Detergent Concentration.....	56
19. Mean Number of Swatches with Fungal Survival on Unsoiled- Inoculated Fabric at 3 Observation Points, 3 Water Temperatures, and Washed in a 0.0% Detergent Concentration.....	57
