INTRODUCTION TO THE SIMULATION OF CONTROL SYSTEMS
USING THE ANALOG COMPUTER

by

JOHN WAYNE HERMAN

B.S., Kansas State Teachers College, 1973

A MASTER'S REPORT

submitted in partial fulfillment of the

requirements for the degree

MASTER OF SCIENCE

Department of Electrical Engineering

KANSAS STATE UNIVERSITY
Manhattan, Kansas

1975

ACKNOWLEDGMENTS

I wish to express my appreciation to Dr. Richard R. Gallagher of the Department of Electrical Engineering for his many hours of assistance in completing this paper. His scholarship and understanding contributed to my being able to successfully complete this degree. My thanks also go to Drs. W. W. Koepsel, Donald R. Hummels and Richard F. Sincovec for serving on my committee and for the many hours they spent in class and in private guiding me through the program.

I would also like to thank my wife for her encouragement, patience, and typing ability, all of which were of immeasurable value in my success.

TABLE OF CONTENTS

	Page
ACKNOWLEDGMENTS	ii
LIST OF FIGURES	vi
Chapter	
1. INTRODUCTION	1
2. INTRODUCTION TO THE ANALOG COMPUTER	5
2.1. EXPERIMENT I: LINEAR EQUATIONS	5
2.1.1. Purpose	5
2.1.2. Background Material	5
2.1.3. Magnitude Scaling	6
2.1.4. Example of Magnitude Scaling	7
2.1.5. Time Scaling	14
2.1.6. Example of Time Scaling	15
2.1.7. Simulation of Systems Represented by Transfer Functions	18
2.1.8. Checking the Program	22
2.1.9. Assignment	24
2.2. EXPERIMENT II: NON-LINEAR EQUATIONS	24
2.2.1. Purpose	24
2.2.2. Background Material	24
2.2.3. Scaling of Non-linear Equations	25
2.2.4. Non-linear Elements in the Analog Computer	27

Chapter	Page
2.2.5. Assignment	28
2.3. EXPERIMENT III: STATE VARIABLE SYSTEMS	29
2.3.1. Purpose	29
2.3.2. Background Material	29
2.3.3. Example of Conversion to State Variable Form	32
2.3.4. Programming of Equations in State Variable Form	34
2.3.5. Example of State Variable Programming	34
2.3.6. Assignment	38
3. SIMPLE CONTROL SYSTEMS	39
3.1. EXPERIMENT IV: TYPE N SYSTEMS	39
3.1.1. Purpose	39
3.1.2. Background	39
3.1.3. Assignment	40
3.2. EXPERIMENT V: REAL TIME SIMULATION AND MODEL IMPROVEMENT	42
3.2.1. Purpose	42
3.2.2. Background	42
3.2.3. Real Time Simulation	43
3.2.4. Choosing the Input Excitation and Error Measure	43
3.2.5. Model Improvement	47
3.2.6. Common Types of Non-linearities Found in Control Systems	48
3.2.7. Assignment	53

Chapter	Page
3.3. EXPERIMENT VI: SYSTEMS WITH TRANSPORT DELAY	53
3.3.1. Purpose	53
3.3.2. Background	53
3.3.3. Temperature Control Systems .	55
3.3.4. Simulation of Time Delays . .	56
3.3.5. Assignment	57
4. OPTIMIZATION	59
4.1. EXPERIMENT VII: COMPENSATION	59
4.1.1. Purpose	59
4.1.2. Background Material	59
4.1.3. Classical Techniques of Compensation	59
4.1.4. Example of Classical Compensation	64
4.1.5. Compensation Using State Variable Techniques	69
4.1.6. Example of State Variable Compensation	76
4.1.7. Assignment	79
4.2. EXPERIMENT VIII: COMPARISON OF COMPENSATED SYSTEMS	80
4.2.1. Purpose	80
4.2.2. Assignment	80
5. ADDITIONAL PROJECTS	81
5.1. PARTIAL DIFFERENTIAL EQUATIONS	81
5.1.1. Statement of the Problem . .	81
5.1.2. References	81

Chapter	Page
5.2. DESCRIBING FUNCTION ANALYSIS	82
5.2.1. Statement of the Problem . .	82
5.2.2. References	82
REFERENCES	83
