## ACKNOWLEDGEMENTS

I would like to thank Dr. David Laurie and his graduate teaching assistants who teach the Concepts labs for their assistance in submitting items for the questionnaire; also to Dr. Laurie for his assistance in the evaluation of the questions.

I would especially like to thank my major advisor, Dr. Charles B. Corbin, and my committee members, Dr. John Merriman and Dr. Donald Hoyt, for the time, patience and numerous acts of assistance in the completion of this thesis.

A special thank you is extended to three gentlemen that provided help for this thesis; to Rick Garvin for organizing and programming my raw data for analysis by the computer and to Pat Murray and Paul Shimon for their assistance in the telephone and personal follow-ups.

## DEDICATION

I would like to dedicate this thesis to my wife, Leanna. Without her love, understanding and constant reassurances this project would never have been initiated let alone completed.
