

APPLYING QUASILINEARIZATION TECHNIQUE TO
AIR POLLUTION AND BIOENGINEERING SYSTEMS MODELING

by

ACKNOWLEDGEMENT

The author would like to express his extreme appreciation to his major advisor, professor E. S. Lee, for his patient guidance, criticism, and assistance in the preparation of this Master's report.

He would like to dedicate this to his sister and his wife, without their encouragement and help he would not have ever started this program.

This work was partially supported by Grant GK - 26212 X, National Science Foundation and Grant 14-31-0001-3678, Office of Water Resource Research, U.S. Dept. of Interior.

TABLE OF CONTENTS

	page
ACKNOWLEDGEMENT	ii
LIST OF FIGURES	vi
LIST OF TABLES	vii
CHAPTER 1. INTRODUCTION	1
CHAPTER 2. QUASILINEARIZATION	6
2.1 INTRODUCTION	6
2.2 GENERALIZED NEWTON-RAPHSON FORMULA	7
2.3 PRINCIPLE OF SUPERPOSITION	8
CHAPTER 3. AIR POLLUTION MODELING AND OPTIMIZATION BY QUASILINEARIZATION	11
3.1 INTRODUCTION	11
3.2 AIR POLLUTION MODEL	11
3.3 PARAMETER ESTIMATION	17
3.3.1 AN ESTIMATION PROBLEM	17
3.3.2 COMPUTATIONAL CONSIDERATION	19
3.3.3 THE LEAST SQUARES APPROACH	21
3.3.4 COMPUTATIONAL PROCEDURES	21
3.4 NUMERICAL RESULTS	35
3.4.1 ESTIMATION OF FIVE PARAMETERS WITHOUT EXPERIMENTAL ERRORS	36
3.4.2 ESTIMATION OF FIVE PARAMETERS WITH EXPERIMENTAL ERRORS	38
CHAPTER 4. OPTIMIZATION OF A REVISED DYNAMIC DECOMPOSITION MODEL IN AIR POLLUTION BY LINEAR PROGRAMMING	63

	page
4.1 INTRODUCTION	63
4.2 THE MODEL	65
4.3 COMPUTATIONAL PROCEDURE	73
4.4 NUMERICAL RESULTS	74
4.4.1 Case 1	77
4.4.2 Case 2	78
4.4.3 Case 3	78
4.5 DISCUSSION	79
CHAPTER 5. IDENTIFICATION OF THE KINETICS OF GLUCOS AND INSULIN IN PLASMA BY QUASILINEARIZATION	87
5.1 INTRODUCTION	87
5.2 THE MODEL	87
5.3 SIX EXPERIMENTAL DATA	89
5.4 PROBLEM WITH MORE THAN SIX EXPERIMENTAL DATA	91
5.5 COMPUTATIONAL CONSIDERATION	91
5.6 COMPUTATIONAL PROCEDURE	92
5.7 NUMERICAL RESULTS	98
5.8 DISCUSSION AND CONCLUSION	100
CHAPTER 6. IDENTIFICATION OF THE CARDIOVASCULAR INDICATOR- DILUTION CURVE BY QUASILINEARIZATION	110
6.1 INTRODUCTION	110
6.2 THE MODEL	110
6.3 THREE EXPERIMENTAL DATA	114
6.4 PROBLEM WITH MORE THAN THREE EXPERIMENTAL DATA	116
6.5 COMPUTATIONAL CONSIDERATION	117
6.6 COMPUTATIONAL PROCEDURE	117
6.7 NUMERICAL RESULTS	118

	page
CHAPTER 7. CONCLUSION	138

LIST OF FIGURES

FIGURE	page
1. Schematic representation of a 25-cell model	40
2. A Diagram as an Example to Show the Derivation of the Conservation of Mass Equation	86
3. The Metropolitan Air Pollution Control Regions	85
4. Profiles of the SO ₂ Concentration in Regions x1, x10, x11, and x15	55
5. Profiles of the SO ₂ Concentration in Regions x7, x9, x12, and x14	56
6. Profiles of the SO ₂ Concentration in Regions x ₈ and x13	57
7. Convergence Rates of region x6	58
8. Convergence Rates of region x13	59
9. Actual and Noisy Measurements of SO ₂ Concentration in Region x5	60
10. Actual and Noisy Measurements of SO ₂ Concentration in Region x6	61
11. Actual and Noisy Measurements of SO ₂ Concentration in Region x13	62
12. Convergence Rate of H	108
13. Convergence Rate of G	109
14. Convergence Rate of C1	134
15. Convergence Rate of C2	135
16. Convergence Rate of C3	136
17. Convergence Rate of C4	137

LIST OF TABLES

TABLE	page
1. Numerical Values Used as Experimental Data Without Random Noise	41
2. Initial Values Used for Obtaining the Particular and Homogeneous Solutions	42
3. Convergence Rates of V1, V2, V3, V4, and V5 with Data Set 1	43
4. Convergence Rates of V1, V2, V3, V4, and V5 with Data Set 2	44
5. Convergence Rates of V1, V2, V3, V4, and V5 with Data Set 3	45
6. Convergence Rates of V1, V2, V3, V4, and V5 with Data Set 4	46
7. Convergence Rates of V1, V2, V3, V4, and V5 with Data Set 5	47
8. Convergence Rates of V1, V2, V3, V4, and V5 with Data Set 6	48
9. Experimental Data with 5% Noise	49
10. Experimental Data with 10% Noise	50
11. Convergence Rates of V1, V2, V3, V4, and V5 with 11 Data Points and 5% Noise	51
12. Convergence Rates of V1, V2, V3, V4, and V5 with 11 Data Points and 10% Noise	52
13. Convergence Rates of V1, V2, V3, V4, and V5 with 101 Data Points and 5% Noise	53
14. Convergence Rates of V1, V2, V3, V4, and V5 with 101 Data Points and 10% Noise	54
15. Optimal Solution for the Metropolitan Area Air Pollution Control Regions - Case 2	81

TABLE	page
16. Optimal Solution for the Metropolitan Area Air Pollution Control Regions - Case 3	82
17. Formulation of the Revised Dynamic Decomposition Model for the Metropolitan Area Air Pollution Control - Case 1	83
18. Initial Conditions Used for Obtaining the Homogeneous Solutions	102
19. Numerical Values Used as Experimental Data	103
20. Convergence Rates of I_1 , I_3 , I_4 , I_6 , $H(0)$, and $G(0)$	104
21. Initial Conditions Used for Obtaining the Homogeneous Solutions	128
22. Numerical Values Used as Experimental Data	129
23. Convergence Rates of B_1 , B_2 , and B_3	130
24. Optimal Solution for the Metropolitan Area Air Pollution Control Regions - Case 1	180
