ACKNOWLEDGMENTS

The final report here submitted is based upon a research proposal "An Investigation and Analysis of Commerce Graduates, 1963-1967," submitted to Kansas State University's College of Commerce, April, 1969, by George G. Dietrich, then candidate for the degree of Master of Science in Business Administration.

The research was carried out under the supervision of a research committee under the chairmanship of Dr. Joseph Barton-Dobenin of the College of Commerce. Appreciation is also expressed for the able contributions of Dr. Paul Gilkison also of the College of Commerce, and Dr. Floyd H. Price of the College of Education.

My sincerest gratitude also goes to the many graduates who made the project possible by responding to the questionnaire and to the College of Commerce for providing the materials and postage.
