ACKNOWLEDGMENTS

The author is extremely grateful for the counsel and guidance received from his major professor, Dr. E. G. Heyne, during the course of his graduate study and in the development of this report.

Grateful acknowledgment is given to Dr. Warren L. Prawl for his constructive criticism, suggestions and guidance in the preparation and arrangement of this study.

Sincere appreciation and thanks to Dr. R. L. Vanderlip and Dr. O. W. Bidwell for their help and their participation as committee members.

Gratitude is also expressed to the Agency for International Development program, Kansas State University, the Department of Agronomy and the Kansas Cooperative Extension Service for providing assistance and facilities to the author throughout his study program.

LIST OF TABLES	v
LIST OF FIGURES	vi
CONVERSION FACTORS	vii
 Chapter	
I. INTRODUCTION	
Problem statement	1
Purpose of the study	1
Scope of the study	1
II. SURVEY OF EXTENSION IN THE UNITED STATES	
Objectives	4
Organization	5
Extension teaching methods	12
Teaching agriculture in the United States	16
Coordination of extension, research and teaching	20
III. GENERAL CHARACTER AND AGRICULTURAL SITUATION OF MOROCCO	
Geographical characteristics of the country	23
Climate	23
Soils and vegetation	27
Population and living conditions	28
The agricultural situation	29
Traditional sector	
Modern sector	
Field crops and crop production	
Agricultural extension and education	34
Agricultural research	35
IV. WHEAT PRODUCTION IN MOROCCO	
Production and consumption	37
Varieties of wheat in Morocco	41
Recent introduction of new wheat varieties	43
Wheat culture in Morocco	45
Production limitations of wheat	47

Chapter	Page
V. SUGGESTIONS FOR WHEAT TECHNICAL WORK	
Use of fertilizers	51
Nitrogen	51
Phosphorus	53
Potassium	53
Methods of application	54
Development of new varieties	56
Soil-management practices	58
Mechanization of traditional farms	58
Seedbed preparation	59
Erosion control	61
Seeding practices	63
Weed control	65
Irrigation	66
Research coordination	70
VI. SUGGESTIONS FOR EXTENSION WORK	
Objectives	75
Reorganization	77
Cooperation between extension, research and education	83
Introduction of change	85
Statement of the problem	85
Determination of needs	87
Motivation	88
Adoption process	89
Communication role	91
Extension methods	94
Individual methods	95
Group methods	96
Mass methods	100
Other methods	103
Training of extension agents	104
Agriculture and home-economics extension coordination	106
Extension youth work	108
VII. SUMMARY AND RECOMMENDATIONS	112
CONCLUSION	116
LITERATURE CITED	117

LIST OF TABLES

Table	Page
1. Estimated Distribution of Agricultural Land in Morocco, by Ownership, 1965	30
2. Output of Principal Agricultural Commodities in Morocco, Average 1961-65 and Annual 1966-70	33
3. Wheat Area, Production and Yield in Morocco During Various Periods, 1972	38
4. Bread Wheat (<i>T. vulgare</i>) Importation by Morocco from 1966-70	40
5. The Selected Varieties of Wheat in Morocco	41
6. Morocco's Commercially Grown Wheat Varieties, 1971	42
7. Results of the Research Service's Varietal Yield Trials in Morocco, 1972	44
8. Water Use from Emergence to Various Stages of Plant Development, Irrigated Wheat Grown Under Unlimited Soil Moisture Conditions, Garden City, Kansas, 1970	68
9. Daily Use by Physiological Period for Irrigated Wheat Grown Under Optimum Soil Moisture at Garden City, 1970	69
10. Available Water Holding Capacity of Soils in Kansas as Affected by Texture, Garden City, 1970	69
11. Comparisons of Winter Wheat Varieties Grown in Kansas for Important Agronomic Traits, Disease, and Insect Resistance and Quality Characteristics, Kansas, 1972	74

LIST OF FIGURES

Figure	Page
1. Organization Chart, Cooperative Extension Service, Kansas State University, Manhattan	8
2. Geographical Characteristics and Explanation of Main Irrigation Areas, Morocco, 1965	24
3. Rainfall of Morocco, 1965	26
4. Wheat Yield Variation in Quintals, 1965	39
5. A Proposed Administrative Reorganization of Extension Service Within the Ministry of Agriculture of Morocco	78
