

ACKNOWLEDGEMENTS

The author wishes to express appreciation to his major professor, Dr. Orlo Sorenson, for his kindness, patience and helpful suggestions and critiques. The examining committee of Dr. Norman Whitehair and Dr. Frank Orazem in addition to Dr. Sorenson were also most helpful.

Thanks are also in order to Karen Farley who ably assisted with the computer programming. Many organizations assisted in the study by supplying facts, figures and advice.

Lastly, survey data would be meaningless without the cooperation which was so readily given by the elevator operators. A special thanks go to Ken Stielow, who logged many miles in taking the survey.
