ACKNOWLEDGMENT

I would like to acknowledge the guidance and support of Dr. David W. Norman, my major professor, who patiently directed me during the preparation of this report.

Further acknowledgments go to Dr. E. W. Nafziger and Dr. Mark Newman, members of my graduate committee, for their valuable suggestions regarding the study.

I also wish to make special acknowledgment to Dr. Richard Phillips, of the Department of Agricultural Economics, for his theoretical suggestions and comments regarding the computer programs employed in this study.
