

FACTORS AFFECTING SHOWCASE COLOR STABILITY OF FROZEN
LAMB IN TRANSPARENT FILM

by

MELVIN CHASE HUNT

B. S., Kansas State University, 1965

ACKNOWLEDGEMENTS

The author wishes to express sincere appreciation to Dr. D. H. Kropf, major professor, for his guidance and sincere interest during the author's masters program. The author also expresses appreciation to Dr. H. J. Tuma for coordinating the efforts of the entire frozen meat research project.

Acknowledgement is made to the American Sheep Producers Council for their financial support of the study and to National Cylinder Gas Division of Chemetron Corporation, Hussman Refrigeration Company, Holophane Company Inc., and Cryovac Corporation for supplying equipment used in the research.

Special thanks is extended to R. A. Smith for his help in collecting data and to all the other graduate students for their fellowship during the graduate program.

To his wife, Rae Jean, the author expresses his deepest appreciation for her support and understanding during the completion of this work.

TABLE OF CONTENTS

<u>Chapter</u>	<u>Page</u>
I. INTRODUCTION	1
II. REVIEW OF LITERATURE	3
Importance of Color in Meat	3
Chemistry of Fresh Meat Pigments	4
Methods of Color Measurement in Meat	8
Factors Affecting Color of Frozen Meat	13
Freezing rate	13
Display temperature and time	14
Display lighting	18
Packaging	19
Effect of Freezing on Weight and Drip Losses	22
Literature Cited	27
III. FACTORS AFFECTING SHOWCASE COLOR STABILITY OF FROZEN LAMB CHOPS IN TRANSPARENT FILM	35
Experimental Procedure	36
Sample selection, preparation and display	36
Color and weight determinations	37
Statistical procedures	38
Results and Discussion	38
Packaging film	39
Freezing temperature	42
Display temperature	43
Lighting	45
Marbling	49
Weight loss	49
Drip loss	49
Correlation of reflectance and visual score	51

Chapter

Summary	53
Literature Cited	55
APPENDIX	58

LIST OF TABLES AND FIGURES

<u>Table</u>	<u>Page</u>
1 Effect of Freezing Temperature and Packaging Film on Mean Visual Score and Percent Reflectance at 630 mu of Frozen Lamb Chops at Several Time Periods	40
2 Effect of Display Temperature and Lighting on Mean Visual Score and Percent Reflectance at 630 mu of Frozen Lamb Chops at Several Time Periods	44
3 Simple Correlation Coefficients Between Lamb Chop Visual Score and Wavelength Reflectance and Reflectance Ratios at All Time Periods	52
<u>Figure</u>	<u>Page</u>
1 Approximate Energy Distribution of Deluxe Cool White Fluorescent and Incandescent Lamps and Percent Transmission of Light by Incandescent Holophane Prismatic Fixture	46
2 Percent Weight Loss of Fresh Packaged and Frozen Lamb Chops at Various Time Periods	50

LIST OF APPENDIX TABLES

<u>Appendix</u>		<u>Page</u>
A	Visual Score Scale, Identification of Time Periods and Variables	58
B	Orthogonal Comparisons	59
C	Treatment Combinations	60
D	Variable Means For All Evaluation Time Periods	61
E	Effect of Packaging Film, Freezing Temperature, Display Temperature and Lighting on Frozen Lamb Chop Mean Visual Score and All Reflectance Variables	62
F	F-Values for Position and Treatment Effects on Weight, Visual Score, and All Reflectance Variables	74
